**O**n behalf of Mallinckrodt, Andrew led successful and at times contentious negotiations among several ad hoc creditor groups and two official creditors’ committees to secure the Company’s long-term access to cash collateral at the outset of the case, and was architect of the Company’s successful “cram down” case at confirmation. Andrew assisted Nine Point Energy in winning court approval of DIP financing and section 363 sale of substantially all assets through a credit bid from the Company’s secured lenders and hedging counterparties, which held ~\$260M in funded debt obligations.
