Increase the ambition of the EU Emissions Trading System (EU ETS)

The European Commission adopted a much-needed revision of the EU Emissions Trading System (EU ETS). Commissioner Vestager provided the keynote speech at the 25th IBA Competition Conference, on 28 October 2021, in Brussels/London.

Land use, forestry, and agriculture

The European Commission has published guidance on the EU rules on single-use plastic products. The Commission has also launched the impact assessment phase of its review of the Climate Law (Delivering the European Green Deal | Fit for 55 package).

The FCA published these principles in response to the significant increase in funds applying for authorisation and on an ongoing basis. The FCA aims to ensure that any ESG investment product.

More than 90% of UK financial firms believe that the EU Taxonomy Climate Delegated Act will have a significant impact on their business. The framework is intended to help Member States define the economic activities that best contribute to the EU’s climate and environmental objectives.

The European Commission has published guidance on the EU rules on single-use plastic products. The Commission has also launched the impact assessment phase of its review of the Climate Law (Delivering the European Green Deal | Fit for 55 package).
